[illegible]

*ALTERNATE*

Figure 1 displays a 10x10 grid of 100 small images, each representing the result of a 1000-iteration ensemble of the proposed algorithm. The images are arranged in four groups of 25 images each, labeled 74HC138, MUX, 74ALS138, and MUX. Each group contains five rows of five images. The images show various patterns of noise and artifacts, with some images showing more significant corruption than others. The labels are placed to the left of each group of images.
